

Surviving the slow season

A cash-flow playbook for the trades.

02

Win it in the busy season

Bank a 3–6 month cushion. Sweep a fixed % of every job before it feels spendable.

03

Sell weather-proof work

Maintenance plans, opposite-season installs, tune-ups
— the highest-margin work you'll book.

04

Mine past customers

Your cheapest pipeline isn't a lead site — it's the people who already paid you.

05

Don't go dark on marketing

It's cheapest when competitors go quiet. Pour in then, not at peak prices.

The full playbook.
