

Facebook or Google?

Where a contractor's ad dollar actually works.

02

Google catches demand

Someone typing 'emergency plumber near me' is ready to book NOW. That's the money.

03

Facebook creates demand

Nobody scrolls Facebook needing a roof. Great for brand + big-ticket, slow for emergencies.

04

Start where the intent is

Small budget? Google Local Service Ads first — pay per lead, badge included.

05

Then layer social

Once the phone rings from Google, use Facebook to stay famous in your zip code.

Spend where it books.
