

The 5 numbers every contractor should know

Run the business — don't let it run you.

02

1. Cost per booked job

Per lead source. The only marketing number that touches your bank account.

03

2. Close rate

Quotes sent vs jobs won. If it's low, it's a follow-up problem, not a lead problem.

04

3. Average job value

Nudge it up with good/better/best options. Same trucks, bigger tickets.

05

4. Gross margin - 5. Booked weeks ahead

Margin says if it's worth it. Backlog says when to spend on marketing.

See your business clearly.
